ROKY Holdings (Pvt) Ltd.

We are specialized in the fields of water treatment, wastewater treatment, and civil construction.

Our expert team is dedicated to providing you with the most reliable and affordable solutions and civil construction as per your requirements.

Our success is your satisfaction.

Purity of Trust

Mission

Provide possession of purified water for every human being, our goal is to be known as the most reliable and affordable water treatment, and wastewater management solution provider and to be a trustworthy building construction service provider, who delivers a quality professional service beyond the customers' maximum satisfaction by making optimal use of all available resources.

Vision

To be an icon among water treatment, wastewater management, and construction service provider, but not a key that everyone can replicate.

Water Treatment

We are dedicated to providing clean and safe drinking water to our customers. Our services involve removing impurities and contaminants to make it appropriate for a specific end-use by using advanced water treatment technologies such as RO, Nano, UF, Media filters, Medium scale water treatment plants and package type plants etc.

Our treatment designs are basically focused on the water quality report and the requirements of the customer. Our aim is to enhance the quality of the life by empowering the field of water treatment in industrial and domestic.

POE -Point Of Entry

The need for separate filter systems at each water dispenser in your house is eliminated by point-of-entry water filtration systems.

POE -Point Of Use

Systems for point-of-use water filtration should be used wherever you use water, such as in the bathroom, bathtub, washing machine, or water bottle.

Package Type Water Treatment System

Package plants include cutting-edge treatment components, like adsorptive clarifiers, package processes are not fundamentally distinct from other types of treatment processes.

Conventional Water Treatment System

Most conventional water treatment systems combine coagulation, sedimentation, filtration, and disinfection to give people clean, safe drinking water.

Hybrid Water Treatment System

As per the special requirements like less space and water quality parameters, we provide hybrid water treatment plants with a combination of conventional type water treatment plants and package type water treatment plants as a single unit. In this hybrid system, we use suitable media filters, RO, and Nano according to the treatment plant design.

Wastewater Treatment

The process of treating wastewater entails removing and getting rid of impurities before turning it into an effluent that can be put back into the water cycle.

As much suspended solids, total dissolved solids as possible must be eliminated during wastewater treatment before the leftover water, known as effluent, is released back into the environment. We should treat wastewater as a nature lover and to live in a healthy lifestyle.

Package Type Wastewater Treatment Plant

Japanese unique advanced wastewater treatment plant, Johkasou Kubota offers a broad range of products in areas where sewage infrastructure has not yet been improved, to meet all required treatment levels, applications, and purposes.

Conventional Type Wastewater Treatment

Conventional Sewage Treatment Plant uses an activated sludge process to biodegrade and remove pollutants from wastewater for discharge or reuse purposes.

Conventional sewage treatment systems are based on the activated sludge process and its variations. These consists of,

- ▶ Activated Sludge System
- ▶ Extended Aeration
- ▶ Sequencing Batch Reactor (SBR)
- ▶ Moving Bed Bioreactor (MBBR)

Civil Construction

We have relevant technical staff to fulfill any construction requirement such as housing projects, industrial constructions, water retaining structures etc. as per the client's expectation. We are dedicated to offer most creative and reliable construction service according to the client's budget.

Building Construction

The land is also a significant factor and land will truly determine the budget for the building. We employ a number of tactics to reduce the cost of building a house.

Our ability to develop enduring relationships with our clients is based on our commitment to delivering quality tasks on time according to the budget.

- ▶ Blockwork/Brickwork
- ▶ Plastering and Finishing
- ▶ Painting
- ▶ Sewerage Systems
- ▶ Water Treatment System
- ▶ MEP Works
- ▶ Concrete Work
- ▶ Steel Structure
- ▶ Timber Structure
- ▶ Swimming Pools
- ▶ Roof Works

Renovation

We are equipped to handle every facet of a renovation job, ensuring that it is completed skillfully and in accordance with building codes.

- ▶ Demolishing
- ▶ Blockwork/brickwork Repair
- ▶ Slab Extensions
- ▶ Infrastructure Facilities
- ▶ Plastering and Finishing
- ▶ Bathroom Fittings
- ▶ Water Treatment
- ▶ Sewerage System
- ▶ Water Treatment Systems

Water Tanks

We provide the finest underground water tank from RCC, and ferrocement as per the client's requirements. With years of proven experience and expertise, we can provide you with a high-quality water tank suitable for your unique storage application.

- ▶ Overhead ferrocement water storage tanks
- ▶ On-ground ferrocement water storage tanks
- ▶ Underground water storage tanks
- ▶ Septic tanks
- ▶ Industrial water tanks

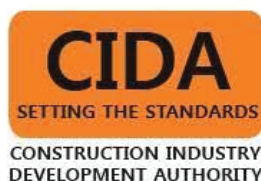

Consultancy and Troubleshooting

With years of experience in the water and wastewater treatment area, ROKY Holdings expert specialists are happy to review your current water treatment requirements and provide you with in-depth recommendations to enhance the performances of existing systems and new ones.
